

CISSP Certification Preparation

The Certified Information Systems Security Professional® (CISSP) is an industry-standard certification for Information Security management, providing Information Security professionals with an objective measure of competence and a globally recognized standard of achievement. CISSP is the first ANSI/ISO-accredited certification program in the field of Information Security. The CISSP credential demonstrates competence in the ten domains of the (ISC)²* CISSP Common Body of Knowledge® (CBK).

Course Description: CISSP Certification Preparation

The CISSP Certification Preparation course gives potential CISSP test candidates an overview of the ten domains that comprise the (ISC)² Common Body of Knowledge

- Information Security and Risk Management
- Access Control
- Telecommunications and Network Security
- Cryptography
- Security Architecture and Design
- Operations Security
- Application Security
- Business Continuity Planning and Disaster Recovery Planning
- Legal, Regulations, Compliance and Investigations
- Physical (Environmental) Security

Who should attend

CISSP is ideal for CISO's, CSO's, Senior Security Engineers and mid to senior-level IT managers working toward those positions. Other candidates include CISSP exam candidates and Information Security technology staff.

Format

This is a five-day course comprising classroom lectures and discussions, quizzes and a practice test. Students will receive copies of all the slides used in the course.

Objectives

Upon completion of this course, students should understand the major topics of each of the ten domains of the CBK and be prepared to sit for the CISSP exam. Visit the CISSP Web site (www.isc2.org) for a complete list of exam requirements.

Reference Material

The course is coordinated with the best-selling and highly acclaimed text, *The CISSP Prep Guide, Mastering the CISSP and ISSEP Examinations*, by Ronald L. Krutz and Russell Dean Vines.
