

CLOUD MIGRATION ASSESSMENT

The **Cloud Migration Assessment** leverages Gotham's Cloud expertise and **Turbonomic** tools to help you better understand the cost of migrating on-premises workloads to the Cloud.

Our Cloud technology experts work with your IT staff to understand your current environment as well as your objectives for moving to the Cloud. We then install and configure Turbonomic accordingly.

After four weeks of data collection (recommended), we generate reports, analyze the data, and prepare an assessment report.

The report includes three sets of cost projections for Microsoft Azure and/or Amazon Web Services (AWS), based on:

- Current on-premises VM allocations
- Turbonomic optimized allocations
- Gotham best practices

Costs are provided for monthly (on-demand) pricing along with one-year and three-year reserved instances.

There are many factors to consider when migrating workloads to the cloud, and having a better understanding of the costs involved will help you prioritize these factors as you move forward.

For more information on how we can help you plan and execute your Cloud migration, contact your Gotham Account Manager.

Gotham Technology Group is a leading provider of Cloud, End-User Computing, Data Center, Cybersecurity, and Collaboration Solutions. Gotham offers the full lifecycle of services from product fulfillment through implementation to managed services and support.

Turbonomic is the leading provider of AI-based application resource management solutions.
