

Gotham Identity Whiteboard

Powered by IDMWORKS

Identity is today's main attack vector. Ensuring your users are provisioned and deprovisioned properly is the first step in preventing data loss. Gotham will visually map your entire Identity & Access Management (IAM) program from source of truth, through security operations, and everything in between. This assessment includes a digital replica of the whiteboard session and provides actionable recommendations for your security program.

Operational Impact

Enables stakeholders to see the full scope of IAM, including identity lifecycle, access provisioning, governance, and integrations, all in one place.

Facilitates cross-functional collaboration by visually mapping roles, responsibilities, and dependencies.

Helps uncover gaps in IAM capabilities.

Serves as the foundation for building a phased implementation roadmap, showing quick wins, long-term goals, and how different IAM components fit together.

Enterprise Advantages

Visually map how IAM components interact with business systems, helping teams understand technical and operational dependencies.

Quickly evaluate solution options, trade-offs, and architectural decisions in real time.

Highlight areas of elevated risk, helping to prioritize controls and mitigations.

Visualize the impact of IAM changes on users, processes, and systems, aiding in adoption and communication across the organization.

Engagement, Pricing, and Terms

Our flexible engagement model is designed to meet your specific needs. Services are all-inclusive making support costs manageable and predictable.

Seeing our entire identity ecosystem laid out visually helped us identify critical gaps, align our teams, and build a clear roadmap
