

# Attack Surface Management

Powered by Axonius

## General Overview

Gotham's Attack Surface Management Assessment delivers a comprehensive evaluation of all potential entry points that adversaries might use to gain unauthorized access to your organization's digital assets. It goes beyond traditional vulnerability scans to include assets that may be overlooked.

### Assessment Benefits

**Comprehensive Visibility:** Automatic identification and inventory of every device, user, application, and service across hybrid and multi-cloud environments.

**Security Gap Awareness:** Aggregation of data from existing tools reveal gaps, redundancies, and hidden assets.

**Operational Efficiency:** Better insight into your environment enables reduced response and triage times.

**Executive-Ready Reporting:** Clear, customized dashboards and reports for leadership and technical teams.

### Engagement, Pricing, and Terms

Our flexible engagement model is designed to meet your specific needs. Services are all-inclusive making support costs manageable and predictable.

### Enterprise Advantages

**Prioritize and Quantify Risks:** Contextualizes security data and directs focus to potential problem areas.

**Streamline Compliance:** Automated, auditable reports support regulatory obligations and simplify audit processes.

**Increase Efficiency:** Automated discovery of assets and unnecessary resources optimizes operations.

**Support Proactive Security Management:** Helps analysts anticipate and remediate risks before they are exploited.

*Gotham's Attack Surface Assessment showed gaps we never would have seen using disconnected tools."*
