

# RemoteAdmin for NetScaler

## General Overview

RemoteAdmin for NetScaler provides expert remote administration for your NetScaler infrastructure. Our services include comprehensive monitoring, optimization, and management of NetScaler instances to ensure peak performance and security.

### Why Gotham?

We stand out as the ideal provider for NetScaler administration due to our **extensive knowledge and hands-on experience** with NetScaler products.

Our team of **certified NetScaler experts** is dedicated to ensuring the optimal performance of your infrastructure.

We are committed to delivering **exceptional service** and exceeding customer expectations.

*With Gotham's RemoteAdmin for NetScaler, we've seen a significant improvement in application delivery and network performance."*

### Exceptional Value

Our proactive approach to NetScaler environments includes:

- Patching zero-day vulnerabilities to protect against emerging threats
- Providing 24x7 monitoring and support
- Delivering customized load balancing and security enhancements
- Improving application delivery, reducing latency, and strengthening security posture
- Enhancing Citrix environment security and functionality through targeted value points
- Updating SSL certificates to ensure secure communications
- Adding, modifying, and testing Virtual IPs (VIPs) for optimized network traffic

### Engagement, Pricing, and Terms

Our engagement model is flexible and client-focused. We offer a range of contract options, including all-inclusive fixed-term agreements and scalable pricing models tailored to the scope and complexity of your NetScaler environment.

Beyond our NetScaler expertise, we provide end-to-end support across the entire Citrix stack—including Virtual Apps and Desktops, Endpoint Management, and Content Collaboration. Our holistic solutions optimize performance, strengthen security, and ensure a seamless user experience throughout your Citrix ecosystem.
