

Microsoft License Audit & Optimization

Complimentary Assessment

Powered by: Axonius

What We Do

Most organizations are overpaying for Microsoft 365 licenses by holding onto unused seats, opting for E3 or E5 where E1 or F1 would be more optimal, or purchasing redundant products & add-ons. Gotham's Microsoft License Audit gives you a clear, data-driven picture of what you have, what you need, and exactly where you can cut costs without cutting capability.

What We Audit

Gotham conducts a thorough assessment of your tenant across every Microsoft product family, including:

License Assignment vs. Actual Activity
Identify dormant and over-licensed users

SKU Alignment by Role
M365 E1/E3/E5/E7, F1/F3, Teams, Intune, Power BI

Redundant Product Overlaps
Identify add-ons already included in base license levels

Shared Mailboxes & Service Accounts
Additional, commonly assigned paid licenses that may be unnecessary

What You Get

What you receive at the end of the assessment:

- **Full inventory** of all assigned licenses and usage data
- **Right-sizing** recommendations mapped to each user role
- **Projected monthly & annual savings** with clear line-item detail
- **Prioritized remediation** roadmap & executive summary

| 1,503 Active Microsoft Users | 195 Inactive / Unused Seats | \$8,828 Monthly Waste Identified | \$105,939 Annual Waste Identified |
|--|---------------------------------------|--|---|
| Action | Scope | Est. Monthly Savings | Priority |
| Remove inactive E3 seats | 88 inactive seats | \$2,970 | ● Immediate |
| Remove inactive E5 seats | 107 inactive seats | \$5,858 | ● Immediate |
