Gotham Technology Group Partners with Trend Micro to Secure Virtual Desktops

Montvale, New Jersey – July 30, 2010 - Gotham Technology Group, an IT consulting firm working in the New York City Metro Area and throughout the Northeast, today announced that it has partnered with Trend Micro Incorporated to offer its clients a broader spectrum of security solutions. Trend Micro, a global leader in Internet content security, recently released the industry's first hypervisor-agnostic, virtualization-aware endpoint security offering. Trend Micro™ OfficeScan™ 10.5 is the company's endpoint security solution for medium-sized businesses and enterprises. OfficeScan 10.5 is designed to help solve the challenges unique to endpoints deployed in a Virtual Desktop Infrastructure (VDI).

 Leveraging a proven project methodology and extensive experience, Gotham provides clients a wide variety of information technology solutions, including virtualization, infrastructure, storage, and information security solutions. Gotham's strong relationships with industry leaders including Microsoft, Citrix and VMware, combined with its highly regarded professional services offerings, make it a perfect complement to Trend Micro's virtualization security solutions.

"Gotham Technology Group has a history of providing their clients best of breed IT solutions that are optimized for security without sacrificing business performance. We are excited to be partnering with Gotham," said Eric Berkman, US director of value added resellers, Trend Micro.

Ken Phelan, Gotham's chief technology officer states, "Because we do so much with virtual desktops, we're always looking for partners who are pushing the envelope there. Trend Micro's solution offers something unique–a secure virtual desktop that doesn't significantly impact performance."
